Details

Description

A Greek manufacturing company is preparing a proposal for the Fast Track to Innovation (FTI) call. Its vision is to scale up, test and commercialize a new design, manufacturing and distribution paradigm for furniture and interior design systems. The main innovation of the action lies in the production of customized, personalized, bespoke furniture, directly created by the customers themselves, using an automated industrial production line. The project aims to reduce significantly the production costs while, at the same time, fully meeting the customers' needs and maintaining a high manufacturing quality. During the FTI action, the company will validate the system and

production process in an operational environment, within the European market initially, through a pilot end-user market in the form of a property management or real estate partner. The task will be to prepare all the equipment, processes, and strategies needed in order to eventually reach the consumer market.

The Greek company is looking for one industrial partner coming from either property management or real estate company. The collaboration sought is to participate in the FTI project.

The EOI deadline is on the 15th October. The Greek company will apply to the call H2020-EIC-FTI-2018-2020 with deadline on the 27th October 2020.
